

## **bfs special plug IV for batteries with bayonet fitting R16**

The plug V4N000 based on bfs plug IV is a special plug desined for using on batteries with bayonet opening 16mm, for example VARTA Series UPS H.

The adapter plug can be used with a float of 14mm diameter.

Because of the special design of the adapter the filling pressure is limited to a maximum of 0.6 bar (9psi).

It could happen that the maximum filling level marked on the battery housing overtravels and must be approved by the manufacturer of the battery.

It is recommended to water the batteries toward the end of the charging time.

Never fill distilled water in the battery before it has been charged.

Art. Nr. V4N000
